

Technical Data Sheet

Product Code VACslipNA1

Product Description PTFE coated glass fabric - non porous - non adhesive
 Stocked width: 1m (range of other widths available)
 Nominal material thickness 0.003" (0.076mm), 0.005" (0.125mm)
 or 0.010" (0.250mm)
 Usage temperature 240°C

General Description A non-porous, PTFE coated, woven glass fabric without adhesive. Ideally suited for use as a reusable tool surface release ply / slip sheet. The PTFE surface coating provides release from all types of resin system.

Properties

Glass fabric weight: 150g/cm², 275g/cm², 480g/cm²
Nominal thickness: 0.076 mm, 0.125mm, 0.250mm
Maximum Usage Temperature: 240°C

IMPORTANT INFORMATION:

The information cited is in good faith and has been established from sources held to be secure and reliable. The values listed are typical properties and are not intended to be used as specifications for defined applications. Users must determine the product suitability for the end use application and assume all risks and liabilities.
